

REMARKS

The amendments above do not add new matter to the claimed invention in claims 4-7. These claims are amended to recite the correct claim number of the claim from which they depend. The Examiner has already considered the subject matter of these claims and thus no new search is necessary. Accordingly, this amendment should be entered.

The amendments above also does not add new matter to the claimed invention in claim 23. The element "different shaped" blocks were already included in many other claims of the application. The Examiner has already considered the subject matter of these claims, thus, no new search is necessary. Accordingly, this amendment should be entered.

The amendments above also do not add new matter to the claimed invention in claims 55 and 57-59. Claim 55 is amended to include the elements of claim 56. Claim 56 is thus canceled. Claims 57-59 are amended to recite the correct claim number of the claim from which they depend. The Examiner has already considered the subject matter of these claims and thus no new search is necessary. Accordingly, this amendment should be entered.

Deposit Account Authorization

Authorization is hereby given to charge our Deposit Account No. 02-2666 for any charges that may be due. Furthermore, if an extension is required, then Appellant hereby requests such extension.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR
& ZAFMAN LLP

Appendix A

Please amend claims 4-7 as follow: (all pending claims, amended and not amended are listed here)

4. (Once Amended) The flexible display device as in claim [2] 1 wherein said display device conforms to a desired shape of an object which is planar when said flexible display device is attached to said object.

5. (Once Amended) The flexible display device as in claim [2] 1 wherein said display device conforms to a desired shape of an object which is non-planar when said flexible display device is attached to said object.

6. (Once Amended) The flexible display device as in claim [2] 1 wherein each of said blocks comprises an active circuit element which drives a picture element.

7. (Once Amended) The flexible display device as in claim [2] 1 further comprising:
a display generation substrate coupled to said active matrix backplane.

23. (Twice Amended) A flexible display device comprising:
a flexible substrate;
a passive matrix display backplane coupled to said flexible substrate; and
said passive matrix display backplane comprises a plurality of different shaped blocks
that are deposited onto said flexible substrate.

55. (Once Amended) A display device comprising:
a flexible substrate; and
a flexible reflective display backplane coupled to said flexible substrate wherein said flexible reflective display backplane comprises a plurality of shaped blocks which are deposited onto said flexible substrate.

57. (Once Amended) The display device as in claim 55 [56] wherein said display device conforms to a desired shape of an object when said flexible display device is attached to said object.

58. (Once Amended) The flexible display device as in claim 55 [56] wherein each of said shaped blocks comprises a circuit element which drives a picture element.

59. (Once Amended) The display device as in claim 55 [56] further comprising:
a display generation substrate coupled to said flexible reflective display backplane.
